Kawasaki Kisen Kaisha, Ltd.

K Marine Ship Management Pte. Ltd. and Solverminds Jointly Develop
Dedicated SIRE 2.0 (New Ship Inspection) Program-Ready Management Module

K Marine Ship Management Pte. Ltd. (KMSM), a ship management company of the Kawasaki Kisen Kaisha, Ltd. (“K” LINE) Group, completed the development of a dedicated SIRE 2.0*1-ready management module with SVM Solutions and Technologies Pte. Ltd. (Solverminds). This module is based on KMSM’s KONECT*2 ship management business platform and this development is ahead of the initiatives of other companies.

KMSM manages reports on ship safety, inspections, maintenance and other matters on KONECT. KMSM and Solverminds started jointly developing a dedicated SIRE 2.0 management module that works on KONECT in 2022. The dedicated management module was built to comply with the SIRE 2.0 ship inspection process. The module incorporates items from the new CVIQ*3 standard for SIRE 2.0, enabling the comprehensive management of processes from the preparation for inspections to the reporting after the completion of inspections. It is expected to increase the quality and efficiency of business.

The “K” LINE Group will further advance the digitalization of information and administrative processes as well as vessels, maintain providing industry leading safe and optimal service and continue to ensure safety in navigation and cargo operations.

*1. SIRE 2.0

The Ship Inspection Report Programme (SIRE), formulated and managed by OCIMF, has been revised and it is expected that SIRE 2.0 will start being used in the second quarter of 2024.

*2. KONECT

Digital ship management platform developed by Solverminds and customized for KMSM. Previously, ship inspection results were reported via various media including email and Excel documents. KONECT has realized the unified management of databases, consolidating ship management data including ship inspection information on a single platform. The platform has many functions serving as integrated solutions, such as a safety control system and safety and quality control, ship inspection management, scheduled maintenance, procurement and training functions. KONECT is expected to further improve quality through methods such as the effective use of big data and process optimization.

***3. CVIQ**

Compiled Vessel Inspection Questionnaire. A unique, vessel-specific set of questions compiled for each vessel inspection.

<Company profiles>
