Dear Customer,

European 24 Hour Advanced Manifest Rule (4)

You may have noted from the EU Commission website the list of data requirements for submission of an ENS declaration
under the forthcoming European Advanced Manifest Rule.
We have prepared the below table for our customers to have a clear understanding of how much of this information
has to be provided in Shipping Instructions (SI) and where neccessary we have also endeavoured to explain the level of accuracy and detail
that is neccessary to enable K Line to submit the neccessary ENS declaration. It is a basic rule that all information must be accurate and correct.
Any erroneous data provided to K Line may result in rejection of ENS, delay of cargo or penalties and fines.

There are some items of information that we will require in addition to that already contained in standard SI that are currently submitted
to K Line for Europe bound cargo. There are also items of information that must be shown in your SI in the correct format, such as addresses.
This will assist us to load information into our manifest system in a format that will produce a correct ENS submission.

EU Requirement (as per EU Commission wording):	Description of declaration item as per EU commission's wording
In Common Language:	Description commonly used
Mandatory / Optional:	Whether the information is mandatory or optional
