Kawasaki Kisen Kaisha, Ltd.

Land Transport of Electric Vehicles for G20 in Bali, Indonesia

PT. “K” Line Mobaru Diamond Indonesia (KMDI), an affiliated company of Kawasaki Kisen Kaisha, Ltd. (“K” LINE), has completed land transportation of electronic vehicles (EV) for G20 summit held in Bali, Indonesia on 15th and 16th November.

Total of 860 electric vehicles were provided for G20 summit by multiple manufacturers that produce finished vehicles locally. The vehicles are transported by carrier car from each plant in Java island to Jakarta port and Jakarta port to Bali island by domestic vessel. KMDI was responsible for the carrier car transportation of approx. 40% of the vehicles.

While the Indonesian government is working to build up EV supply chain in Indonesia against the backdrop of rich natural resources such as nickel, it adopted various policies to implement more EV such as promoting governmental organization to use EV. The vehicles that are used for G20 summit are battery electric vehicles (BEV) only.

In our Medium-Term Management Plan published in May 2022 (Note1), we have defined logistics business as the role of contributing by enhancing profitability and are working to strengthen and expand our automotive logistics business. KMDI owns more than 300 car carriers and has the biggest share in Indonesia. While we continue to strengthen the business in Indonesia where stable growth in finished car production and sales is expected, we will keep contributing to the Indonesian government’s target to achieve carbon neutral by 2060.

(Note 1) Medium-Term Management Plan (Released on May 9, 2022)
